<h3>
Status for week ending 3/27/2001</h3>
1.Testing still underway for Shopping List Release 1.1 on QA server. It
turned out that the VL5 headers were not initially turned for the cs.com
alias of the server. Currently, VL5 authentication works for both web users
and in-service users (AOL and CS).
<p>We just noticed another problem, initially reported by the CTA team,
where if two users sign in from a web browser in succession, the second
user is authenticated as the first user!
<p>I have informed the vlsupport team of the problem. The installation
of the new release of Shopping List on production servers is likely to
be delayed, pending investigation of the problem.
<p>2. The Merchant Comparison module is modified to work with a text database
of the local store merchants. Both the grid version and standard-html version
of the MC are working now. We are awaiting the activation of the proximity
search interface at DCI so that we can start sending queries to DCI to
look up local stores.
<p>3. Reviewed and provided feedback for the QA Test plan for Local Stores.

<h4>
Next Week:</h4>
1. Continue testing of VL5 plugin.

2. Work on implementation of Local Stores.

3. Support CTA Banner service and Shopping List.</html>
